

Fun with Math

Complete by finding the value of each symbol

$$\text{trophy} \times \text{scissors} = 70$$

$$\text{scissors} + \text{trophy} = 18$$

$$110 \div \text{trophy} = 11$$

$$\text{trophy} \times \text{trophy} = ?$$

$$\text{trophy} = \underline{\quad}$$

$$\text{trophy} = \underline{\quad}$$

$$\text{scissors} = \underline{\quad}$$

$$\text{motorcycle} \times \text{game controller} = 48$$

$$\text{game controller} \times \text{clapperboard} = 36$$

$$180 \div \text{motorcycle} = 15$$

$$\text{motorcycle} \times \text{clapperboard} = ?$$

$$\text{motorcycle} = \underline{\quad}$$

$$\text{game controller} = \underline{\quad}$$

$$\text{clapperboard} = \underline{\quad}$$

Answer Key

Complete by finding the value of each symbol

$$\begin{array}{l} \text{trophy} \times \text{scissors} = 70 \\ \text{scissors} + \text{trophy} = 18 \\ 110 \div \text{trophy} = 11 \\ \text{trophy} \times \text{trophy} = 110 \end{array}$$

$$\begin{array}{l} \text{trophy} = 10 \\ \text{trophy} = 11 \\ \text{scissors} = 7 \end{array}$$

$$\begin{array}{l} \text{motorcycle} \times \text{game controller} = 48 \\ \text{game controller} \times \text{factory} = 36 \\ 180 \div \text{motorcycle} = 15 \\ \text{motorcycle} \times \text{factory} = 108 \end{array}$$

$$\begin{array}{l} \text{motorcycle} = 12 \\ \text{game controller} = 4 \\ \text{factory} = 9 \end{array}$$
