

Fun With Math

Complete by finding the value of each symbol

$$\text{Scissors} + \text{Scissors} + \text{Wrench} = 16$$

$$30 = \text{Hammer} + \text{Set Square} + \text{Set Square}$$

$$13 \times \text{Hammer} = 0$$

$$\text{Set Square} + \text{Gear} = 19$$

$$\text{Gear} \times \text{Scissors} = 28$$

$$\text{Wrench} + \text{Gear} + \text{Scissors} = ?$$

$$\text{Wrench} = \underline{\hspace{2cm}}$$

$$\text{Set Square} = \underline{\hspace{2cm}}$$

$$\text{Hammer} = \underline{\hspace{2cm}}$$

$$\text{Scissors} = \underline{\hspace{2cm}}$$

$$\text{Gear} = \underline{\hspace{2cm}}$$

Answer Key

Complete by finding the value of each symbol

$$\text{Scissors}^7 + \text{Scissors}^7 + \text{Wrench}^2 = 16$$

$$30 = \text{Hammer}^0 + \text{Ruler}^{15} + \text{Ruler}^{15}$$

$$13 \times \text{Hammer}^0 = 0$$

$$\text{Ruler}^{15} + \text{Gear}^4 = 19$$

$$\text{Gear}^4 \times \text{Scissors}^7 = 28$$

$$\text{Wrench}^2 + \text{Gear}^4 + \text{Scissors}^7 = 13$$

$$\text{Wrench} = 2$$

$$\text{Ruler} = 15$$

$$\text{Hammer} = 0$$

$$\text{Scissors} = 7$$

$$\text{Gear} = 4$$
